Task Flow 1

Goal:
Cook sign up for an account

Assumption:
1. App market refers to either *Google Play Store* for Android or *Apple App Store* for iOS
2. Cook has downloaded *Reunion* application from app market (refer to *assumption 1*)

Expectation:
1. Registration must be simple, and form inputs must be relevant. Relevant information are:
    a. Name
    b. Email address
    c. Mobile number
    d. Password
    e. Home address
    f. Bank details (e.g. Select bank, account name, account number)
    g. Agree to NEA guidelines
    h. Agree to term of service
2. Registration form must not be lengthy
3. Approval of registration must be less than 2 working days
4. To-be-cook user must be able to use the application while waiting for their approval

Task Flow:
1. Tap to open *Reunion* application (application detects first use, prompt user to sign up or login)
2. Tap "Sign Up" for cook
3. Fill up all given inputs (application allows detail to either input manually or connect using Facebook)
4. Submit the registration form
5. Wait for approval (refer to *expectation 3*)
6. Receive approval confirmation via email, SMS and in-app notification
