Task Flow 2

Goal:
Cook makes a listing of a new dish (minced pork porridge)

Assumption:
1. App market refers to either *Google Play Store* for Android or *Apple App Store* for iOS
2. Cook has downloaded *Reunion* application from app market (refer to *assumption 1*), signed up, approved and login.

Expectation:
1. Upload a new dish must be efficient
2. All inputs must be relevant
3. Auto saving must be included to ensure no data lost

Task Flow:
1. Tap to open *Reunion* application
2. Tap "Add new listing"
3. Fill in details of new dish
   a. Name and description
   b. Desired price
   c. Define category of cuisine (Culture, vegetarian, halal etc)
   d. Possible special requests
   e. Upload images of the dish
   f. Ingredients used
   g. Location and time of delivery or self-collection
   h. Minimum order time (i.e. 8 hours, 16 hours, 1 day or 2 days)
   i. Accept the terms of service
4. Confirm the details of new dish through a preview page
5. Submit the new listing
